Investment of Total Plan Assets

Plan Contributions this Period

Note: Returns are historical and past performance does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of the investment accounts will fluctuate, so that a participant's units/shares when redeemed may be worth more or less than their original cost when redeemed.

Note: Annualized total return figures shown are net of the ordinary operating expenses for each fund, but may not reflect a deduction for any contract-related charges and fees such as mortality & expense risk charges, administrative expenses, premium tax charges, maintenance fees or other expenses that might be incurred under a group variable annuity contract. If included in these total return figures, any such charges would lower the performance shown. For a complete description of the charges, expenses or fees that apply to your contract, please contact your Employer or Plan Administrator. For a more complete description of the performance calculation and other important information, write to One American Square, Indianapolis, IN 46282, 1-800-249-6269.

Note: The current percentage reduction for recurring expense (e.g. investment advisory fees and ordinary operating expenses, administrative charges, mortality and expense risk charges) within your AUL contract is 1.90%.

Note: Money market funds are not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other federal government agency. Although they seek to preserve the value of your investment at \$1.00 per share, it's possible to lose money by investing in money market funds.

See Additional Information about Your Investment Options.

Additional Information About Your Investment Options

Any performance reported before AUL first offered an investment account is hypothetical and was calculated by adjusting the underlying fund's performance by current applicable contract charges.

Unit values are based on net asset values provided by the fund company and are not independently verified by AUL. If AUL receives corrected information, the net asset value will be recomputed and your account will be recalculated, if necessary, to reflect the corrected net asset value, provided that the error is materials under federal securities laws.

Asset Class and Investment Option Specific Disclosures

Bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the fund.

Funds that invest in high-yield bonds are subject to greater credit risk and price fluctuations than funds that invest in investment grade bonds.

Funds investing in stocks of small, mid-sized, and emerging companies may have less liquidity than those investing in larger, established companies and may be subject to greater price volatility and risk than the overall stock market.

Investing in international markets involves risks not associated with investing solely in the U.S., such as currency fluctuation, potential political and diplomatic instability, liquidity risks, and differences in accounting, taxes, and regulations.

Funds that invest in a concentrated sector or focus on a relatively small number of securities may be subject to greater volatility than a more diversified investment.

Target Date Funds are designed for people who plan to retire and begin taking withdrawals during or near a specific year. These funds use a strategy that reallocates equity exposure to a higher percentage of fixed investments; the funds will shift assets from equities to fixed-income investments over time. As a result, the funds become more conservative over time as you approach retirement. It's important to remember that no strategy can assure a profit or prevent a loss in a declining market and the principal value of the Target Date Funds is not guaranteed at any time, including the target date. Target Date Funds are designed to provide diversification and asset allocation across several types of investments and asset classes, primarily by investing in underlying funds. Therefore, in addition to the expenses of the Target Date Funds, an investor is indirectly paying a proportionate share of the applicable fees and expenses of the underlying funds. The principal amounts invested in these funds are not guaranteed at any point and may lose value.

Emerging markets involve risks in addition to those generally associated with foreign securities, because political and economic structures in many emerging markets may be undergoing significant evolution and rapid development.

Investors cannot invest directly in any index.

Investments that focus on real estate investing are sensitive to economic and business cycles, changing demographic patterns and government actions.

Additional Information About Your Investment Options (continued)

The use of asset allocation or diversification does not assure a profit or guarantee against a loss.

Non-registered group annuity contracts are issued by American United Life Insurance Company® (AUL), One American Square, Indianapolis, IN 46282, 1-800-249-6269. While a participant in an annuity contract may benefit from additional investment and annuity related benefits under the annuity contract, any tax deferral is provided by the plan and not the annuity contract.

Participants invest in AUL separate accounts, which in turn invest in underlying funds. Plan participants own units of an AUL separate account, not shares of any underlying fund.

If a participant invests in assets held with another company, recordkeeper or vendor, they will receive more than one statement detailing their investments. Examples of these types of assets include self-directed brokerage accounts, real estate, life insurance, or assets with another vendor.

Log into your secure account at www.oneamerica.com to obtain the most current calendar month end performance.
